Approved by AICTE, New Delhi and Affiliated to GTU, Ahmedabad.

Report on Signing of Memorandum of Understanding (MoU) between TATA STRIVE and VBTMCA

Vidyabharti Trust College of Master in Computer Application entered into a collaboration with Tata Community Initiatives Trust (Tata STRIVE) on **1st June 2026** to implement a skill-development programme focusing on Cyber Security Analyst and Youth Development. The initiative is aimed at providing students with industry-oriented technical knowledge, employability skills, and opportunities for holistic professional development.

Programme Details:

The programme is designed to complement students' academic learning with practical and industry-relevant skills.

The Youth Development Module focuses on the development of cognitive, behavioural, and non-cognitive skills, helping students strengthen their communication, professional attitude, employability, and overall personal development.

Key Objectives:

The major objectives of the collaboration are:

- To provide students with industry-oriented training in Cyber Security.
- To develop technical and domain-specific competencies.
- To enhance students' employability and job-readiness.
- To develop professional, behavioural, and interpersonal skills through the Youth Development Module.
- To provide opportunities for assessment, counselling, and certification.
- To strengthen the connection between academic education and industry requirements.

Roles and Responsibilities:

Tata STRIVE will support the programme through student orientation, counselling, trained facilitators, programme scheduling, assessments, quality monitoring, certification, and industry/guest sessions.

The Institute will provide the necessary classrooms, computer laboratory and internet facilities, student coordination, attendance monitoring, scheduling support, and a designated Single Point of Contact (SPOC) for effective implementation of the programme.

Students are required to maintain the prescribed attendance and successfully complete the assessment requirements. A minimum of 80% attendance is specified for eligibility for certification.

Outcome:

The collaboration establishes a structured framework for providing students with industry-linked Cyber Security training combined with Youth Development. It is expected to strengthen students' technical knowledge, employability skills, professional competencies, and preparedness for career opportunities in the technology sector.

Conclusion:

The collaboration between Tata STRIVE and Vidyabharti Trust College of Master in Computer Application is an important initiative towards strengthening industry–academia engagement and skill-based education. The integrated 567-hour programme provides students with an opportunity to enhance their cyber security knowledge along with essential professional and employability skills. The initiative supports the Institute's efforts to prepare students for the changing requirements of the technology industry and to provide them with structured opportunities for professional development and certification.
