On 19th October 2024 a Thalassemia Testing Camp was conducted at Vidyabharti Trust College. The camp was organized by the Vidyabharti Trust Campus, Umrakh in Association with YGEN Healthcare Pvt. Ltd. The Thalassemia Testing Camp was organized to create awareness about Thalassemia among the students of Vidyabharti Trust Colleges and to encourage early testing for better health management. The camp aimed to provide students with the opportunity to know their Thalassemia status in a convenient and supportive environment.

The camp aimed to identify individuals carrying the Thalassemia trait, which is crucial for early detection and prevention of Thalassemia major, a severe form of the disorder. The event commenced with a traditional lamp-lighting ceremony, attended by the principals of various institutions within Vidyabharti Trust and the chief guest from YGEN Healthcare Pvt. Ltd. This symbolic act marked the beginning of the camp, emphasizing the importance of shedding light on health-related issues like Thalassemia.

A session on Thalassemia awareness followed the inauguration. The speech highlighted the genetic nature of Thalassemia, its impact on health, and the importance of knowing one's status. The speaker from YGEN Healthcare stressed the significance of early testing, especially for young adults, and how it can help in making informed decisions about marriage and family planning.

After the awareness session, the testing procedure began. A large number of students participated, including 66 students from the BSc.IT department, who volunteered for blood testing. The healthcare professionals from YGEN Healthcare managed the testing process, ensuring a safe and systematic approach to sample collection. Students who participated in the testing were provided with preliminary guidance on understanding their Thalassemia status and the implications of their test results. YGEN Healthcare ensured that students had access to information and support during this phase.

The event concluded with a vote of thanks delivered by the principal of SNPIT. The principal expressed gratitude to YGEN Healthcare Pvt. Ltd. for their collaboration and appreciated the enthusiastic participation of the students. The principal also acknowledged the efforts of the organizing team in making the camp a success.

The camp was an important step toward promoting health awareness within the student community. It highlighted the collaborative efforts between educational institutions and healthcare providers to ensure the well-being of students. The event's success reflects a positive shift towards proactive health management among young adults in the Vidyabharti Trust community.
